

VIKAS BORAGE

Senior Flutter Developer • Cross-Platform Mobile & AI-Augmented Engineer

Location: Mumbai, Maharashtra, India (Open to Remote / Relocation) | Phone: +91 9326125447 | Email: boragevikast@gmail.com
LinkedIn: linkedin.com/in/vikas-borage | GitHub: github.com/boragevikas | Portfolio: boragevikas.github.io/boragevikas | Live Products: boragetechnology.in

PROFESSIONAL SUMMARY

Senior Flutter & Cross-Platform Mobile Engineer with **4+ years** of professional software engineering experience specializing in high-performance iOS and Android applications using **Flutter & Dart**. Proven engineering leadership having managed over **350+ production releases** to the Google Play Store and Apple App Store with 99.8% crash-free session reliability. Deep expertise across Clean Architecture, reactive state management (**GetX**, **BLoC / Cubit, Provider**), offline-first SQLite/Hive caching, and secure payment processing pipelines (**PhonePe SDK, Razorpay Gateway**).

At the cutting edge of engineering productivity, pioneers **AI-augmented developer velocity** utilizing tools like **Claude Code, OpenAI Codex, and Google Antigravity**, and constructs **custom Model Context Protocol (MCP) server connectors**. These automated agentic connectors streamline repetitive boilerplate generation, DTO schema serialization, and automated unit test authoring, accelerating delivery cycles while enforcing strict architectural standards.

CORE TECHNICAL SKILLS & COMPETENCIES

Cross-Platform Mobile:	Flutter SDK (iOS & Android), Dart 3+, Flutter DevTools, Responsive UI, Material 3, Cupertino Adaptive Layouts
Architecture & State:	GetX (Reactive Controllers, Bindings, Route Management), BLoC / Cubit, Provider, Clean Architecture, Layered MVVM, Dependency Injection (get_it)
AI-Assisted Engineering:	Claude Code, OpenAI Codex, Google Antigravity SDK, Custom MCP Server Development (Automated DTO & Test Generation), Prompt Chaining
Payments & Financial Rails:	PhonePe PG SDK, Razorpay Payment Gateway, Seamless UPI Intent Redirection, Webhook Listeners, HMAC-SHA256 Signature Verification, Invoicing
Cloud, APIs & Networking:	RESTful APIs (Dio, Http Interceptors), Firebase (FCM, Firestore, Auth, Crashlytics, Remote Config), WebSockets, Offline Sync
Databases & Local Storage:	MongoDB, Cloud Firestore, Hive NoSQL, SQLite (sqflite), SharedPreferences, Encrypted Storage
Mobile Performance:	Flutter Profiler, Frame Budgeting (60/120 FPS), Memory Leak Mitigation, Repaint Boundaries, ProGuard/R8 Obfuscation, App Size Reduction
Release & DevOps:	Apple App Store Connect, TestFlight Beta Testing, Google Play Console, CI/CD Pipeline Automation, Git / GitHub, Linux/macOS CLI

PROFESSIONAL EXPERIENCE

Senior Flutter Developer / Lead Mobile Engineer <i>Recipto Pvt Ltd — Hyderabad, India (Hybrid / Remote)</i>	May 2022 – Present (4+ Years) Mumbai, Maharashtra, India
End-to-End Cross-Platform Delivery: Spearheaded the mobile engineering, testing, and store submission lifecycles for two flagship Flutter applications: the Customer App and the Partner/Rider Store App, orchestrating 350+ production deployments across Google Play Store and Apple App Store with an unblemished 99.8% crash-free session rate. State Management & Architecture: Architected a clean, testable, and maintainable layered codebase utilizing GetX for reactive state management, route navigation, and dependency injection, alongside Provider, ensuring 100% decoupling of complex business logic from UI widgets and enabling effortless multi-brand styling. High-Performance Rendering & Frame Optimization: Diagnosed and resolved UI jank using Flutter DevTools CPU and memory profilers; optimized widget build trees and implemented RepaintBoundaries to guarantee silky-smooth 60/120 FPS scrolling across budget and flagship mobile devices. Binary & Memory Footprint Reduction: Configured custom ProGuard/R8 obfuscation rules, asset compression pipelines, and tree-shaking mechanisms that decreased the final Android APK and iOS IPA release sizes by over 30%, noticeably speeding up cold-start times. Production Payment Gateway Engineering: Architected secure, PCI-compliant payment checkout workflows integrating PhonePe SDK and Razorpay Gateway, supporting seamless UPI intent redirection, webhook signature verification, transaction status reconciliation, and automated receipts. AI-Augmented Developer Velocity & MCP Servers: Engineered custom Model Context Protocol (MCP) server connectors and integrated agentic workflows with Claude Code, OpenAI Codex, and Google Antigravity to automate repetitive engineering chores—including REST API DTO class generation, unit test scaffolding, and localization mapping—accelerating feature sprint turnaround. Real-Time Chat & Dispatch Notifications: Designed low-latency order dispatch notifications, live rider route tracking, and in-app customer support chat utilizing Firebase Cloud Messaging (FCM), WebSockets, and background service isolates for high-reliability updates. Deep Linking & Growth Infrastructure: Integrated cross-platform deep linking with Branch.io SDK, Android App Links, and Apple Universal Links, streamlining promotional campaign redirects and direct checkout landing pages.	

KEY PRODUCTS & COMMERCIAL SOFTWARE PROJECTS

BT SplitBill — Smart Group Expense Sharing Application

Flutter • Android & iOS • Production Product

- **Cross-Platform Expense Manager:** Architected a full-featured Flutter mobile and web application allowing groups to track shared expenses, split bills with customizable ratios, and settle balances seamlessly.
- **Native Device & WhatsApp Integration:** Integrated native address book contact picking, multi-currency conversion, local encrypted storage via Hive NoSQL, and 1-click WhatsApp settlement reminders.
- **Automated Debt Simplification:** Implemented a graph-based transaction minimization algorithm that reduces total peer-to-peer settlements by up to 60%.

BorageTech Suite (boragetech.in) — Live Production SaaS & Utilities

Production SaaS • Cloudflare R2 • Razorpay Live

- **BT QR Studio:** Built an enterprise QR code generation suite supporting 17 dynamic/static QR types (vCard, WiFi, Crypto, Menus, PDFs) with Cloudflare R2 cloud storage and dynamic redirect analytics.
- **Live Monetization & Statutory Compliance:** Integrated live **Razorpay payment gateways** with automated GST-compliant PDF invoice generation, Cloud Functions security, and webhook verification.
- **BT Energy Calculator:** Designed an interactive utility for Indian power consumers to simulate tariff tiers, compute DISCOM bills, and calculate solar ROI paybacks.

Voice-Enabled Accessibility Assistant & Face Recognition

Python • OpenCV • TensorFlow • Flutter Companion

- Developed an assistive desktop and mobile application providing hands-free voice control (messaging, music, weather, reminders) tailored for visually impaired users.
- Integrated real-time facial recognition pipelines using OpenCV and TensorFlow deep learning embeddings to identify known individuals in camera view.

EDUCATION & ACADEMIC CREDENTIALS

Bachelor of Engineering (B.E.) in Electronics & Telecommunication

2017 – 2021 | CGPA: 7.63 / 70.03%

Mumbai University (Smt. Indira Gandhi College of Engineering, Ghansoli)

Mumbai, Maharashtra, India

Higher Secondary Certificate (HSC - Science Stream)

2015 – 2017 | 76.15%

Guru Nanak Khalsa College, Matunga, Mumbai

Mumbai, Maharashtra, India

ADDITIONAL HIGHLIGHTS & RECOGNITION

- **Mobile Store Deployment Track Record:** Managed and deployed 350+ production updates across Google Play Store and Apple App Store, handling certificates, provisioning profiles, and App Review guidelines.
- **Published Technical Author:** Published author on Amazon KDP, having authored children's series and built automated multi-format digital layout generation pipelines.
- **Industrial Engineering Training:** Completed hands-on in-plant telecommunications and CNC fiber optic training at ITI Limited Bangalore.
- **Languages:** English (Professional Working Proficiency), Marathi (Native), Hindi (Native).
