

# VIKAS BORAGE

## Software Developer • Web, Mobile & Cloud Engineer

Location: Mumbai, Maharashtra, India | Phone: +91 9326125447 | Email: [boragevikast@gmail.com](mailto:boragevikast@gmail.com)  
LinkedIn: [linkedin.com/in/vikas-borage](https://www.linkedin.com/in/vikas-borage) | GitHub: [github.com/boragevikas](https://github.com/boragevikas) | Portfolio: [boragevikas.github.io/boragevikas](https://boragevikas.github.io/boragevikas)

### PROFESSIONAL SUMMARY

**Versatile Software Developer** with **4+ years** of professional experience building, testing, and deploying cross-platform applications across mobile, web, and cloud environments. Demonstrated track record managing **350+ production releases** across the Google Play Store and Apple App Store, maintaining high runtime performance and clean code standards. Proficient in Dart, Python, JavaScript, and HTML/CSS, with deep expertise in Clean Architecture, reactive state management (**Provider, GetX, Bloc/Cubit**), RESTful APIs (Dio), offline-first local persistence (**MongoDB, Hive, SQLite**), push notifications, and payment gateways. Proven ability to thrive in agile, remote, and cross-functional teams.

### CORE TECHNICAL COMPETENCIES

|                       |                                                                                                               |
|-----------------------|---------------------------------------------------------------------------------------------------------------|
| Languages:            | Dart, Python, JavaScript (ES6+), HTML5, CSS3, SQL                                                             |
| Web & Mobile:         | Flutter SDK (Android, iOS, Web), Responsive Web UI, Tailwind CSS, Alpine.js, Kotlin/Swift interoper           |
| Architecture & State: | Clean Architecture, Layered MVVM, Provider, GetX, Bloc / Cubit, Repository Pattern, Dependency Injection      |
| Networking & APIs:    | RESTful APIs, Dio (Interceptors, Retry policies), HTTP, WebSockets, JSON Serialization, Firebase FCM          |
| Cloud & Databases:    | MongoDB, Cloud Firestore, Hive NoSQL, SQLite (sqlite), Firebase Auth, Remote Config, Cloud Storage            |
| Integrations:         | PhonePe SDK, Razorpay, Branch.io SDK (Deep Linking), Google Maps API, Local Notifications, Camera             |
| DevOps & Tools:       | Google Play Console, Apple App Store Connect, TestFlight, CI/CD, Git/GitHub, ProGuard, Obfuscation, Profiling |

### PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                               |

| <b>BT SplitBill — Smart Group Expense Sharing Application</b>                                                                                                                                                                  | Mobile & Web • Integrated Product |
| <ul style="list-style-type: none"><li>Integrated a group expense management application with WhatsApp settlement reminders, contact address book lookup, multi-currency tracking, and automated debt simplification.</li></ul> |                                   |

### BorageTech Web Suite (Energy Calculator & QR Studio)

JavaScript • HTML5 • Tailwind CSS •  
Canvas API

- Developed interactive web tools including an electricity bill tariff calculator and a client-side branded QR code generation suite supporting custom logos and bulk batch export.

### AI Voice-Enabled Accessibility Assistant & Face Recognition

Python • OpenCV • TensorFlow • Mobile  
Companion

- Developed voice-controlled accessibility tool for visually impaired users (messaging, music, weather) paired with deep learning face recognition via OpenCV and TensorFlow.

### Amazon KDP Automated Publishing Pipeline

Python • Pillow • ReportLab • KDP  
Publishing

- Created an automated children's book compilation engine converting storyboards, illustrations, and EPUB/print specs into Amazon KDP compliant publications (author of 'The Little Dragon' series).

## EDUCATION & ACADEMICS

### Bachelor of Engineering (B.E.) in Electronics & Telecommunication

2017 – 2021 | CGPA: 7.63 / 70.03%

Mumbai University (Smt. Indira Gandhi College of Engineering, Ghansoli)

Mumbai, India

## HIGHLIGHTS & LEADERSHIP

- **350+ App Deployments:** Ownership of release pipelines on Google Play Console and Apple App Store Connect.
- **Amazon KDP Author:** Published multi-volume children's illustrated storybook series using automated digital publishing pipelines.
- **Industrial Trainee:** ITI Limited Bangalore (June 2019) — Completed hands-on training in telecommunications, CNC manufacturing, and optical fiber systems.
- **Languages:** English (Full Professional Proficiency), Marathi (Native), Hindi (Native).
