

VIKAS BORAGE

Flutter Developer • Mobile Application Engineer (Android & iOS)

Location: Mumbai, Maharashtra, India | Phone: +91 9326125447 | Email: boragevikast@gmail.com
LinkedIn: [linkedin.com/in/vikas-borage](https://www.linkedin.com/in/vikas-borage) | GitHub: github.com/boragevikas | Portfolio: boragevikas.github.io/boragevikas

PROFESSIONAL SUMMARY

Results-driven Flutter & Mobile Application Engineer with **3+ years** of hands-on experience building, testing, and deploying cross-platform applications for **Android & iOS**. Demonstrated track record of delivering **350+ production releases** across Google Play Store and Apple App Store, maintaining high runtime performance and clean code standards. Deep expertise in Dart, Clean Architecture, reactive state management (**Provider, GetX, Bloc/Cubit**), RESTful APIs (Dio), offline-first local persistence (Hive, SQLite), push notifications, and payment gateways. Proven ability to thrive in agile, remote, and cross-functional teams while leveraging modern AI-assisted engineering tools to accelerate development.

CORE TECHNICAL COMPETENCIES

Mobile Platforms & Languages:	Flutter SDK (Android, iOS, Web), Dart (OOP, Streams, Null Safety), Java/Kotlin interop, Objective-C/Swift interop
Architecture & State:	Clean Architecture, MVVM, Layered Architecture, Provider, GetX, Bloc / Cubit, Repository Pattern, Dependency Injection
Networking & APIs:	RESTful APIs, Dio (Interceptors, Retry policies), HTTP, WebSockets, JSON Serialization, Firebase Cloud Messaging (FCM)
Backend & Cloud:	Firebase (Cloud Firestore, Authentication, Crashlytics, Remote Config, Cloud Storage), MongoDB, Python Services
Local Persistence:	Hive (NoSQL local storage), SQLite (sqlite), SharedPreferences, Path Provider, Offline-first synchronization
Native Device APIs:	Google Maps SDK, Geolocation, Camera, File Pickers, Contacts sync, Local Notifications, Bluetooth communication
Payments & Deep Linking:	PhonePe SDK, Razorpay, Branch.io SDK (Deferred Deep Linking), Android App Links, iOS Universal Links
DevOps & Tools:	Google Play Console, Apple App Store Connect, TestFlight, CI/CD, Git, ProGuard, Obfuscation, Profiling

PROFESSIONAL EXPERIENCE

Software Developer (Mobile Application Developer - Flutter) Recipto Pvt Ltd — Hyderabad, India (Hybrid / Remote)	May 2022 – Present Mumbai, India
Cross-Platform Production Delivery: Led frontend development, release management, and store deployment for two flagship Flutter applications (Customer App & Partner/Rider Store App), delivering 350+ production releases to Google Play Store and Apple App Store. State Management & Architecture: Built modular layered architecture using Provider and GetX, cleanly separating business logic from UI components to maintain reusable code across Android and iOS. Real-Time Chat & Notifications: Implemented order chat pipelines and dispatch notifications using Firebase Cloud Messaging (FCM) and background services for reliable, low-latency updates. Performance & App Size Optimization: Profiled memory leaks and widget rebuilds using Flutter DevTools; reduced app bundle size and improved startup time using ProGuard rules and asset optimization. Payment Gateways & Services: Integrated PhonePe SDK and Razorpay for secure checkout workflows, alongside Google Maps API for live location tracking and Gmail OAuth. Deep Linking & Navigation: Implemented deep linking architectures using Branch.io SDK, Android App Links, and iOS Universal Links to streamline user onboarding and app navigation.	

FEATURED PROJECTS & PRODUCTS

BT Split Bill — Smart Offline-First Expense Sharing Mobile ApplicationFlutter • Dart • Hive • Firestore • AdMob

- Built a standalone expense-splitting app engineered for offline operation using **Hive NoSQL** storage, backed by automatic synchronization with **Cloud Firestore** upon reconnecting.
- Incorporated spending analytics with `fl\_chart`, native contact address book integration, multi-currency ledger calculation, CSV statement exports, and Google AdMob monetization.

Recipto Store & Rider Operations SuiteFlutter • REST APIs • Dio • QR Scanning • Hive

- Designed and deployed an operational mobile platform for store managers and delivery partners featuring instant QR barcode verification, real-time dispatch updates, and multi-format document/attachment uploading (PNG, JPG, PDF up to 10MB).
- Implemented automated retry interceptors and error handling with **Dio** to maintain operational reliability in areas with weak cellular coverage.

AI Voice-Enabled Accessibility Assistant & Face RecognitionPython • OpenCV • TensorFlow • Flutter

- Built an AI-driven voice assistant empowering visually impaired users to manage music playback, check weather, send emails, and initiate WhatsApp messages via speech recognition.
- Implemented real-time webcam facial detection and identification using OpenCV and convolutional neural networks in TensorFlow, paired with a real-time Flutter telemetry interface.

Boragetech Web Apps & Automated Publishing PipelinePython • HTML/CSS • ReportLab • KDP Publishing

- Built web utility apps including an Electricity Bill & Tariff Estimator and a Dynamic QR Code Generator Studio.
- Created an automated children's book compilation engine converting storyboards, illustrations, and EPUB/print specs into Amazon KDP compliant publications (author of 'The Little Dragon' series).

EDUCATION & ACADEMICS

Bachelor of Engineering (B.E.) in Electronics & Telecommunication2017 – 2021 | CGPA: 7.63 / 70.03%
Mumbai University (Smt. Indira Gandhi College of Engineering, Ghansoli)Mumbai, India

HIGHLIGHTS & LEADERSHIP

- **350+ App Deployments:** Ownership of release pipelines on Google Play Console and Apple App Store Connect.
- **Amazon KDP Author:** Published multi-volume children's illustrated storybook series using automated digital publishing pipelines.
- **Industrial Trainee:** ITI Limited Bangalore (June 2019) — Completed hands-on training in telecommunications, CNC manufacturing, and optical fiber systems.
- **Languages:** English (Full Professional Proficiency), Marathi (Native), Hindi (Native).
